# MANUFACTURED FIREPLACES

from the Heart of the Craftsman...

## Products for Manufactured Fireplaces

**ReFace** The Stoll ReFace Collection is engineered to completely cover your wood or gas manufactured fireplace. You can design your own unique ReFace from our selection of styles, colors, finishes and options. The result will be a complete make-over that suits your taste and fits your fireplace perfectly.

Direct Vent (DV) gas fireplaces have become very popular because of their high efficiency, heating capacity, and ease of installation. They do, however, present a singular challenge because of the sealed glass fronts and hot surfaces. The Stoll DV Reface Collection transforms the appearance of your DV fireplace and also adds an element of safety with protective screening.

**ReImagine** what your fireplace could become, **ReDesign** with our varied styles, colors, and design options; then **ReFace** to completely transform your manufactured fireplace.

**Glass Doors** Stoll offers high quality Glass Doors for ZC Fireplaces as an upgrade replacement to OEM doors or screens. These ZC doors offer the same features and design options as our renowned masonry fireplace doors, with one very important addition. ZC Fireplaces require an air exchange between the “inner” firebox and “outer” cabinet to keep all surfaces cool against the walls of your home. All Stoll ZC Glass Doors and Accessories meet ventilation requirements for circulating fireplaces; allowing a proper amount of air to enter the firebox area.

The gallery below represents but a few design possibilities... use them to stir your imagination.

**ZC ReFACE DESIGNS** 

**Contemporary ReFace in Natural Stainless**

**Traditional ReFace in Copper Vein w/ Loyer 1514**

**Blacksmith ReFace Arch Conversion with 1519 Louvers in Tex. Black**

## OVERLAY FINISHES

**NOTE:** Manufactured (ZC) fireplaces require a minimum air flow through the firebox to prevent overheating. Stoll engineers the proper air intake through slots or spaces in the frame and air gaps in the glass. These air inlets are intentional and are not alterable under warranty.

**ReImagine:** Imagine your fireplace with a new look.  
**ReDesign:** Choose the design, colors and accents.  
**ReFace:** Just snap on the new front to complete the renovation.

Every ReFace is unique; specially made for each fireplace by custom-sizing the frame and the louvers to fit perfectly. Easy to measure and easy to install with no tools required.

Our neodymium “rare earth” magnetic mounting system allows the frame to attach firmly, covering the entire face of your fireplace. Best of all, ReFace doors eliminate drafts common with manufactured fireplaces and reduce up to 90% of the heat loss going up the chimney.

Choose from 12 Louver Designs, 25 Finishes and countless custom combinations to create your own unique fireplace ReFace.

# Beauty

Direct Vent gas fireplaces are a popular option in today's home. They are an efficient source of heat, but many do not offer stylish door and screen options. Stoll's DV ReFace Collection is the perfect solution to transform your standard "black box" into a showpiece.

# Safety

Direct Vent fireplaces have sealed glass fronts that can become extremely hot. Our "snap-on" magnetic installation makes it simple to keep loved ones and pets away from the hot surface of the fireplace. DV ReFace screens meet all ventilation requirements of the fireplace manufacturer.

# Custom

Stoll doors and screens are custom made to fit each individual fireplace. Accent any décor with your choice of decorative door designs, finishes and louver designs. For a more personal touch... order custom laser-cut scenes or designs of your own imagination.

**For improved safety and timeless beauty, add a Stoll ReFace.**

# GLASS DOORS FOR ZC FIREPLACES

ZC

**STOLL GLASS DOORS FOR MANUFACTURED FIREPLACES** are known for their quality, style and durability. With five Collections to choose from, there are limitless ways to replace your stock "factory-built" doors with a top quality fireplace enclosure.

## **ZC Traditional Inside Fit**

*Textured Black w/ Silver Vein Doors & Hardware*

The ZC Inside Fit Collection is designed to fit "inside" your metal firebox. Airflow is provided by a 1/4" air gap between the firebox and mainframe. Constructed with 14 gauge formed steel, the Traditional style frame can be powder coated or overlaid with any of our solid finishes.

*Each Collection is specially made to fit your brand of manufactured fireplace, with proper "airflow" provided in various ways to ensure our doors meet all ventilation requirements of the manufacturer.*

ACCENT . BEAUTIFY . ENJOY

## ZC Traditional Overlap

*Filigree Option in Polished Brass Complete Overlay*

Made to "overlap" the opening of the fireplace - the ZC Overlap Collection uses slotted-edges around the outer frame or filigree on top and bottom to allow airflow into the fireplace. Constructed with the same sturdy 14 gauge steel frame as the Inside Fit.

## ZC Trimline

*4-Sided Frame in Weathered Brown w/ Brushed Copper Doors*

Our most popular ZC door - Trimline is made of 1/8" Bar Iron to achieve a thin profile. This uniquely designed frame overlaps the opening slightly, while allowing air to enter the firebox through a thin gap around the main frame. Aesthetically pleasing and very versatile, with hundreds of finish combinations.

## ZC Premium Bar Iron

*Brushed Chrome w/ Textured Black Doors*

Premium Bar is a sturdy, sophisticated look, with it's 1/4" bar iron frame. Each door is custom made, so let your imagination be your guide. Airflow is provided with special spacers on the back of the mainframe, allowing the door to overlap the opening for the look of a masonry door.

## ZC Forged Iron

*Arch Conversion in Charcoal w/ Strap Handles & Hinges*

The unique hand-forged, distressed look, of the Forged Collection will accent your room unlike any other product. No two enclosures are the same. Add strap hinges for an "Old World" look. Spacers on the back of the mainframe provide airflow, similar to the Premium Bar Collection.

Bring your fireplace dimensions to your local Stoll dealer for a quote.

- A. \_\_\_\_\_ Measurement A is measured from the top of the exposed black metal, down to the top of the fireplace opening.
- B. \_\_\_\_\_ Measurement B is measured from the outside of the exposed black metal, in to the side of the fireplace opening. This measurement is the same for both sides.
- C. \_\_\_\_\_ Measurement C is measured from the bottom of the exposed black metal, up to the bottom of the fireplace opening.
- D. \_\_\_\_\_ Measurement D is the total height of the exposed black metal.
- E. \_\_\_\_\_ Measurement E is the total width of the exposed black metal.
- F. \_\_\_\_\_ Measurement F is the width of the fireplace opening.
- G. \_\_\_\_\_ Measurement G is the height of the fireplace opening.
